Pekalongan, Jawa Tengah

I am a Bachelor of Informatics Engineering student who is currently awaiting graduation, with a strong interest in web development, having internship experience at the Communication and Informatics Office of Pekalongan Regency. During my internship, I was actively involved in the development of the Electronic-Based Knowledge System (SPBE) website, a website designed to support the management and dissemination of information digitally in the local government environment. This project involves developing an intuitive, responsive, and easy-to-use interface for various devices. By using the Laravel and Bootstrap frameworks for a modern front-end display, I was able to create an optimal user experience. My interest in website design and functionality drives me to continue learning and applying the latest technologies to produce efficient web solutions.

Experience

Dinas Komunikasi dan Informatika - Kabupaten Pekalongan

Mar 2024 - May 2024

E-Government/Web Developer (Internship)

The Communication and Informatics Office of Pekalongan Regency is a regional government agency tasked with managing information, public communication, information technology, and statistics in the Pekalongan Regency area. This office plays a role in the development of e-government, information technology infrastructure, and the dissemination of information that supports transparency and public services.

- Developing and building an Electronic-Based Knowledge System (SPBE) website to support digital-based governance in Pekalongan Regency.
- Managing website databases, including designing database structures, data storage, and query optimization to improve system efficiency.
- Conduct testing and debugging to ensure website performance is stable, fast, and error-free.
- Collaborate with internal teams and stakeholders to understand system needs and implement improvements based on feedback.
